

Visitor Management System

Providing a safe, secure school is always a priority for Bowles Elementary School. Beginning in October, we are implementing a new visitor management system. This system is an easy way to electronically register and review individuals who visit our school.

SAFETY: OUR FIRST PRIORITY

LEARN MORE ABOUT THESE IMPROVEMENTS.

What's staying the same?

- Door-access technology requires visitors to buzz-in with the school office before entering the school.
- Visitor check-in centers are located at the entrance of our school.
- Security cameras monitor the building and parking lots.
- School resource officers patrol our buildings.
- All exterior doors are locked.
- All visitors wear identification badges.

What's new this year?

- Visitors will provide a driver's license when they arrive at the school check-in center.
- Our Bowles security attendant will verify the driver's license and check the visitor into the school.
- When the visitor has been verified, the system will create a customized badge that includes the name, date, time and destination in the building.
- Then, the visitor will wear this badge while in our school building.
